

VIRTUAL OSCE TRAINING

Run by Expert Trainers.

All aspects of the exam covered in one resource.

The course was developed by expert trainers with examiners' advice and direction. Since pioneering virtual OSCE training, hundreds of nurses have taken virtual training with us and passed first time. Access to our comprehensive online training is also given until the exam is passed.

Live Virtual Training

Created to last 2 days, for 6 hours each day, but as we know candidates struggle to attend the 2 days, it is now all pre-recorded.

Includes full access to our Online OSCE Training Portal

DAY 1 - APIE

Assessment – Get familiar with 10 patients with APIE specific needs and presentation.

Planning – Group work on all the OSCE patients and their typical problems and risk factors that need to be considered. We introduce care plans that address the patients' most urgent needs.

Implementation – Detailed look at how to pass this station using practice charts to identify due medication checks for the exam.

Evaluation – Teaching and practice based on scenarios. Think about all requirements and how to manage time.

DAY 2 - CLINICAL SKILLS and PV/EBP

Professional values and evidence-based practices are covered.

PV and EBP Overview - plus memory jogs and systems to aid recall.

Skills – Marking and how the criteria are weighted in marking.

All skills are covered, focusing on techniques, safety requirements, communication, and all documentation and practice (where possible).

Workbook

A 112 page workbook and practice pack will be sent to your home or work address.

It includes checklists and all forms used in the test.

It also contains example completed APIE paperwork, practice scenarios, prescriptions, and all forms from the exam.

Price and Online Training

Training costs £350 (inc VAT) per person and includes enrolment on our online training portal. Designed to give nurses a strong background in the OSCE, the training portal includes many videos, demonstrations and explanations of each station. Our course is designed to reflect the real exam and the scenarios you could encounter.
